Experience

GDS CAPITAL, INC. Makati City
Junior Forward-Deployed Engineer July 2026 – October 2026

- Engineered project-based agentic AI workflows and an enterprise Retrieval-Augmented Generation (RAG) system using Dify to resolve cross-border knowledge gaps. Analyzed business performance to design comprehensive automation pipelines and containerized AI agents for autonomous cross-node execution, accelerating manual workflows by up to 80% (saving ~21 hours/month) and driving a 60% reduction in operational costs.
- Acted as a primary client-facing engineer to translate business requirements into tailored client platforms across a multi-region infrastructure (Philippines, Hong Kong, Singapore). Partnered with cross-functional stakeholders to deliver resilient systems via Dockerized deployments and centralized NAS integration, eliminating data risks and ensuring 24/7 availability for enterprise operations.
- Partnered directly with the CEO in an Agile, rapid-deployment environment to manage enterprise projects and architect strategic technical roadmaps. Delivered executive-level performance reports and evaluated emerging technologies (including RPA tools and open-source platforms) to modernize the corporate tech stack and expand commercial capabilities.

IT Specialist Intern (AI Product & Growth Trainee) March 2026 – June 2026

- Led the end-to-end development, project management, and optimization of full-stack applications, the GDS OpenClaw ECC dashboard, and public-facing websites, while administering VPS and Windows Active Directory to maintain high system availability for over 70+ internal users.
- Spearheaded agentic AI solutions to deploy autonomous workflows and agents into Feishu, automating key operations for the Compliance department and 6 other cross-functional teams. Collaborated directly with executives to translate data insights into actionable technical roadmaps.

SUN LIFE GLOBAL SOLUTIONS Taguig City
Core Systems Delivery Intern June 2026

- Gained critical exposure to multinational enterprise operations by participating in a SAFe Agile workflow—including cross-border Program Increment (PI) planning and technical Scrum sprints (Indonesia, HK, Vietnam)—and observing COBOL code reviews for a large-scale on-premise to cloud migration.
- Evaluated GitHub Copilot integration strategies to accelerate enterprise AI adoption across foundational Core Systems operations, and tracked engineering delivery performance by compiling and analyzing DORA metrics.

CLOUDJI NOTION TEMPLATES Remote
Founder & Digital Product Freelancer November 2023 – Present

- Design and develop database-driven Notion templates for an international client base, independently managing branding, marketing, and content strategies.
- Scaled brand presence to 6,500+ followers across Pinterest and Ko-fi, driving 15,000+ product downloads and securing 140+ paid customers.

Skills & Certifications

Programming: C#, Python, R, JavaScript, TypeScript, HTML, CSS, SQL
Frameworks & Dev Tools: Linux, Docker, Git, React, Power BI, Hyper-V
AI & Automations: LLM Orchestration, OpenClaw, Dify, RAG, RPA, n8n, Developer Platforms, APIs, Playwright
Design Tools: Figma, Adobe Photoshop, Canva, Affinity
Certifications: Cisco Networking Academy: Networking Devices and Initial Configuration

Education

POLYTECHNIC UNIVERSITY OF THE PHILIPPINES - PARAÑAQUE CITY CAMPUS (PUPPQ) 2022 – 2026
Bachelor of Science in Information Technology | Cum Laude | GPA 1.35 | Graduated September 2026

- **Honors:** Scholar, Metro Pacific Tollways Corporation | President's Lister, 2022-2026 | Champion, Essay Writing Contest - PUPPQ 12th Founding Anniversary
- **Leadership:** President, AICTS, 2024-2025 | BSIT Representative, Central Student Council, 2023-2024 | Delegate, YMCA-NCCS, 2024

Key Projects

GDS OPENCLAW ENTERPRISE CONTROL CENTER May 2026
Project Manager & Full-Stack Developer
Ubuntu Linux, Docker, Hyper-V, Next.js, PostgreSQL, OpenClaw

- Engineered and deployed a centralized administration dashboard to orchestrate autonomous AI agents, integrating live telemetry, cost tracking, and automated, self-healing VM/Docker container auto-spawning with SMTP alerts, secure API key injections, and policy governance.

ENTERPRISE BUSINESS CONSULTING AUTOMATION July - October 2026
Forward-Deployed Engineer & Project Manager
Debian Linux, Docker, Dify, Nest.js, OpenClaw, Feishu, Synology NAS, RPA

- Architected and deployed an enterprise Dify RAG-to-Feishu pipeline hosted on Singapore servers, resolving cross-border knowledge gaps and reducing operational costs.
- Engineered secure government compliance automation pipelines utilizing RPA and continuous AI integration to streamline departmental workflows.
- Developed a Private-LAN client management platform with live Synology NAS connectivity to manage automation outputs, and established governance for deployed AI agents (OpenClaw) across enterprise systems.

Leadership and Activities

ASSOCIATION OF INFORMATION AND COMMUNICATIONS TECHNOLOGY STUDENTS (AICTS)
President September 2024 – June 2025

- Directed a 20-person executive board to execute university-wide IT initiatives and multimedia strategies, steering the BSIT program to win "Overall Champion" in two major interdepartmental campus competitions.
- Represented the organization at the 46th YMCA National Congress of College Students (YMCA-NCCS), Teachers' Camp, Baguio City; competed in a national-level essay writing contest.

AWS STUDENT BUILDER GROUP - CELESTIA
Multimedia Officer November 2025 – Present

- Served as a Core Team member; established visual branding and promoted cloud computing literacy through workshops and seminars.

GOOGLE DEVELOPERS GROUP - PUP
Multimedia Officer, Data & ML Cadet November 2025 – June 2026

- Selected as a Multimedia Officer (50% acceptance rate) to collaborate on visual identity for technical summits.
- Pursued advanced studies in Data Science via a DataCamp scholarship and actively attended Data & ML seminars.
